

Become a WGBI Volunteer!

Women in the
Global Battery Industry

Join one of WGBI's subcommittees and work with others to drive valuable member engagement and drive the group's activities. Subcommittees typically meet once a month for about an hour. Your time commitment should not exceed two hours per month, and you will be able to help shape WGBI's membership and future! If you are interested in serving on a subcommittee, please [Fill out the WGBI Volunteer Interest Form](#).

Join a Subcommittee and Be Part of the WGBI Leadership

Marketing Subcommittee

Support ongoing WGBI communications. Articulate the organization's vision and mission through branded materials that reflect the value proposition. Create visibility for the organization and its program through the WGBI website and social media as well as providing members with toolkits to further our outreach.

Member Education Subcommittee

Provide educational opportunities for members to learn, network and acquire leadership skills to enhance and develop their careers. Offerings include quarterly webinars on topics including career development, technical foundations and industry trends. Facilitate ongoing informal discussion groups and a mentoring program.

Membership Recruitment Subcommittee

Identify potential members from the battery industry's professional and academic communities and coordinate outreach to expand and build the organization. Collaborate with the Marketing Subcommittee to execute a communications and marketing plan to attract new members and retain existing members.

STEM Education Subcommittee

Support STEM education for female students at all levels of their educational development/career (K through post-college graduate). Current programming includes student-sponsored attendance at the BCI Convention + Power Mart Expo, poster showcase at BCI Convention, mentor program and webinar education offerings.

Latin America Regional Chapter

Support the engagement and expansion of our newest regional chapter. WGBI was proud launched the Latin America Chapter in 2025 — an initiative to integrate women working across the battery industry and connect them to a global network of mentorship, education, and professional development.
